Work Experience

Web developer

DecoraPro / Pelotinas 2022-2024

I handle the migration of the company's websites to the AWS platform using services such as EC2, RDS, Route 53, and WAF, as well as providing general maintenance to the sites by adding new sections and functionalities using languages like PHP and JavaScript, with a focus on SEO, supported by tools like Semrush and Google Search Console.

WordPress Web Developer

Ecdisis estudio <https://ecdisis.com/> 2021-2022

My responsibilities included creating databases and users for WordPress installation and configuration, installing necessary themes and plugins for the development of e-commerce websites, designing mockups provided by the design team, and developing additional sections required by the client, including functionalities such as forms and interactive sections.

Website and Corporate Email Administrator

Despacho jurídico Vargas Aldana S.C abogados 2019-20121

My responsibilities included registering a domain and renting a server through a hosting platform, and creating a website using WordPress.

Supplementary Training

I have completed courses focused on web development on various online platforms such as Udemy, Académica, Google, and aprende.org. The diplomas and certificates issued by these platforms can be viewed on my website.
